

SKILLS

- **Languages & Tools:** Kotlin, Java, Android SDK, XML
- **Analytics Platforms:** Firebase Analytics, Google Tag Manager (GTM)
- **Architecture:** MVVM, MVC, Jetpack Components
- **Behavioral Tracking:** Custom event tracking, tag configuration, data layer integration
- **Testing & Debugging:** JUnit, Espresso, Firebase Crashlytics
- **Version Control:** Git, GitLab, GitHub
- **CI/CD:** Jenkins, Firebase

PROFESSIONAL EXPERIENCE

Android Developer December 2020 – December 2023
Gonext Technologies, Ahmedabad, Gujarat

- **Feature Development:** Developed and maintained Android applications by implementing new features and enhancements using Java and Kotlin languages.
- **Team Collaboration:** Worked closely with cross-functional teams, including developers, QA engineers, and designers to deliver mobile applications that met business requirements.
- **Location Services:** Gained hands-on experience with Android Geo-location services for location-based features.
- **Data Storage Management:** Managed data using various Android storage options, such as SD card, internal memory, and external memory.
- **Framework & Libraries Integration:** Utilized Android framework APIs and integrated third-party libraries, background services, and other essential components.
- **Push Notifications & Location Features:** Implemented key features like push notifications, location-based services, and background tasks to enhance app functionality.
- **Release Support & QA Checks:** Conducted post-production checks during major releases and provided support to ensure smooth deployment and stability.
- **Issue Resolution:** Actively participated in resolving high-priority production issues within deadlines to maintain app reliability.
- **Play Store Deployment:** Successfully developed and deployed over 10 fully functional mobile apps on the Google Play Store.
- **Technologies:** Java, Kotlin, Android SDK, Firebase, Google Tag Manager (GTM), Adobe Analytics, Room, SQLite, Retrofit, Jetpack Components, GitLab, Jenkins.

Android Developer June 2019 – December 2020
Swayam Infotech, Rajkot, Gujarat

- **Mobile Application Development:** Designed and developed Android applications with clean architecture and responsive interfaces.
- **API Integration:** Gained solid experience integrating RESTful APIs to enable seamless data communication between the app and server.
- **UI/UX Design:** Skilled in crafting intuitive UI designs and implementing smooth animations to enhance user experience.
- **Third-Party Services Integration:** Integrated Google Maps API and Firebase Cloud Messaging to expand app functionality and user engagement.
- **Team Collaboration:** Worked with designers, product managers, and fellow developers to deliver features that aligned with project goals.
- **Issue Resolution:** Identified and resolved bugs and crashes reported by users and QA, improving app stability and performance.
- **Code Review & Quality Assurance:** Participated in code reviews to maintain high coding standards and supported a collaborative development environment.
- **Technologies:** Java, Android SDK, Retrofit, Firebase, FCM, Google Maps API, XML, Git, GitLab

Android Intern January 2019 – May 2019
Swayam Infotech, Rajkot, Gujarat

- **Technical Training:** Learned Android development fundamentals using Java and Android Studio.
- **UI Development:** Created basic app screens using XML, Constraint-layout, and RecyclerView.
- **Firebase Implementation:** Worked on simple backend features using Firebase Realtime Database and Firebase Cloud Messaging (FCM).
- **Debugging & Testing:** Assisted in resolving issues using Logcat, and performed unit testing with JUnit.
- **Version Control & Reviews:** Used Git and GitLab to manage code and participate in team code reviews.
- **Documentation:** Documented features, workflows, and integration steps for team reference.
- **Technologies:** Java, Android Studio, XML, Retrofit, GSON, Firebase, FCM, Logcat, Git, GitLab, JUnit

PROJECTS

My Folder: Safe Secure Hidden App:

- Developed a security-focused Android application that allows users to securely store and manage various data types, such as images, videos, audios, contacts, and documents, within categorized folders.
- Implemented multiple customizable lock mechanisms (PIN, pattern, password, etc.), app icon masking, and app locking features using usage access permissions.
- Key features include data hiding/unhiding, trash and recycle bin functionality, a storage cleaner, shake-to-lock, and dynamic app icon/name change for added privacy.
- Achieved **1M+** downloads and maintained a **4.2+** star rating on the Google Play Store.
- Technologies: Kotlin, Android SDK, Room, Firebase, Jetpack Components

Incoming Call Lock App :

- Developed an Android app to lock the incoming call screen using 5 types of security methods: pattern, PIN, password, fingerprint, and swipe.
- Allowed users to apply lock on specific contacts, customize background themes, and preview lock settings.
- Included a note and reminder feature triggered after each call.
- Implemented master password support for resetting or recovering lock types.
- Achieved **1M+** downloads on Google Play Store.
- Technologies: Kotlin, Android SDK, Jetpack, Material Design

WiFi Refresh & Signal Alert App :

- Built an utility app to refresh WiFi, scan networks, and monitor signal strength.
- Added alerts for roaming, no service, and low signal conditions.
- Displayed detailed network info: IP, DNS, MAC, frequency, RSSI, etc.
- Tracked mobile and WiFi data usage with daily and custom reports.
- Used system permissions to access SIM info, nearby networks, and app data usage.
- Achieved **100K+** downloads on Google Play Store.
- Technologies: Kotlin, Android SDK, Jetpack

Photo Resize : Compress, Crop App :

- Developed an image utility app to compress, resize, crop, and convert photo formats (JPEG, PNG, WEBP).
- Enabled batch processing of images with adjustable quality, resolution, and size.
- Integrated non-destructive editing to preserve original photos.
- Supported direct sharing of images from the gallery for quick editing.
- Included preview, delete, and share functions for processed images.
- Achieved **100K+** downloads and maintained a **4.2+** star rating on Google Play Store.
- Technologies: Kotlin, Android SDK, Jetpack, Glide

Phone Configuration Checker App:

- Developed a comprehensive tool to check device compatibility and hardware/software diagnostics, including CPU, battery, display, memory, and system info.
- Developed real-time testing modules for camera, sound, screen, sensors, connectivity (WiFi, Bluetooth, GPS), and ports.
- Displayed detailed specs such as CPU architecture, RAM, 5G/4G support, app metadata, notification logs, and GPU info.
- Implemented 25+ hardware and software tests with permission-based feature access (camera, microphone, system settings, etc.).
- Achieved **50K+** downloads on Google Play Store.
- Technologies: Kotlin, Android SDK, Jetpack, Material Design

Video Editor: Watermark Remove App:

- Developed an app to add and remove watermarks from photos and videos with ease.
- Included video editing features: trim, crop, compress, speed adjustment, audio extraction (video to MP3), and filters.
- Added image editing capabilities such as applying filters and watermarking photos.
- Supported saving and sharing edited media files.
- Technologies: Java, Kotlin, Android SDK, Jetpack, FFmpeg

All Smart Tools - Daily Uses App:

- Collaborated in a team to develop a multifunctional utility app featuring 125+ daily-use tools including calculators, converters, health monitors, science utilities, and text editors.
- Contributed to integrating device sensor-based features such as metal detector, accelerometer, vibration detector, and color detector.

- Assisted in implementing media handling capabilities including image compression, QR/barcode scanning, and audio recording with proper permission management.
- Worked closely with teammates to ensure smooth integration of diverse tool sets and sensor APIs.
- Achieved **10K+** downloads on Google Play Store.
- Technologies: Kotlin, Android SDK, Jetpack, Sensor and Camera API

Weather Forecast Alerts App:

- Developed a weather app providing current, daily, and forecast data for any city worldwide with GPS location support.
- Created customizable widgets with multiple styles, colors, and icon sets showing temperature, location, and weather conditions.
- Implemented real-time weather details: temperature, humidity, wind, pressure, visibility, rain, sunrise/sunset times.
- Enabled daily notifications with configurable schedules for weather alerts.
- Supported multiple unit settings for temperature, distance, wind speed, rain, pressure, and wind direction.
- Technologies: Java, Kotlin, Android SDK, Retrofit, Jetpack, OpenWeatherMap API

EDUCATION

Bachelor of Engineering in Computer Engineering
B H Gardi College of Engineering & Technology, *Rajkot, Gujarat*

2015 - 2019

STRENGTH

Android Development

- Experienced in building apps using Java, Kotlin, Android SDK, Jetpack, and MVVM architecture.

UI/UX Design Skills

- Able to create responsive, user-friendly interfaces with smooth animations.

Analytics Integration

- Skilled in Google Tag Manager and Firebase Analytics implementation.

Cross-Functional Collaboration

- Works effectively with product, QA, design, and backend teams.

Version Control & CI/CD

- Proficient with Git, GitLab, and Jenkins for source control and deployment.

Database Management

- Knowledgeable in SQLite, PostgreSQL, and Room Persistence Library.
- Skilled in efficient data storage and retrieval.

Problem Solving

- Strong debugging skills and performance optimization across devices.

Documentation & Code Quality

- Maintains clear documentation and clean, testable code following standards.

Innovative Thinking

- Passionate about exploring new technologies to enhance functionality and user experience.
